PROJECTS

Screaming At Awards Shows — Full Stack CRUD Website

An app to generate text for a personal ballot for different Film and TV Awards Shows. Uses React/Redux for front-end, pulling from a local Restful API for the Award Show data built with Express and MonogoDB.
Github:

Marquee Salad — 'Nilla Javascript Single Page Site

A minimalist web page that helps theater operators know which letters to pull when changing their marquees. Built using "vanilla" Javascript
Github:

Boy Counter Experience— Personal Site that uses the Youtube API

A personal site I built using the Youtube API to populate a page with videos from the web series "Monster Factory." It manages personal data using React/Redux and Flexbox to create a pseudo-blog feed design and navigation.
Github:

EXPERIENCE
